Product Description

Shed & Fence Stain-Black

Black wood stains have proved to be very popular and Black Shed & Fence Stain is no exception. Being a stain it allows the wood grain to show through allowing you to colour your wood whilst retaining its original features. Is easily applied by a sprayer or brush and offers up to 12m2 per litre per coat. For fencing one coat will colour and

weather-proof with a second coat deepening the shade. For sheds it is recommended that two coats be applied for the first treatment with only one coat needed for future maintenance.

Shed & Fence is a cost effective, waterproof, wood stain that enhances the natural beauty of wood. It is used and recommended by professionals as, unlike a lot of competitor brands, it can be applied to old surfaces, planed (finished) and rough sawn timber. Contains wax additives for an extra water resistant and mould resistant coating on vertical surfaces.
