Product Description

Shed and Fence Treatment- Nut Brown

This strong dark brown wood stain is a rich velvety shade that looks striking and natural . The colour is very much like the old mixtures of oil that were used in years gone by but with a more pleasing dark chocolate coloured base.

Is easily applied by a sprayer or brush and offers up to 12m2 per litre per coat. For fencing one coat will colour and

weather-proof with a second coat deepening the shade. For sheds it is recommended that two coats be applied for the first treatment with only one coat needed for future maintenance.

Shed & Fence is a cost effective, waterproof, wood stain that enhances the natural beauty of wood. It is used and recommended by professionals as, unlike a lot of competitor brands, it can be applied to old surfaces, planed (finished) and rough sawn timber. Contains wax additives for an extra water resistant and mould resistant coating on vertical surfaces.
