

Railings

In addition to the Bow-Top, there are dozens of other railing designs available, both traditional and contemporary, which can be used to add that special touch of practical elegance to your new project, or match an existing installation.

Suitable For:
Public parks, schools,
residential

Railings

Vertical Railing Systems

Alexandra Security Limited supplies a wide range of railings from the standard single Bow-Top style, to the highly decorative 'Brenchley' style. Railings are used extensively around public open spaces to create boundaries that are aesthetically pleasing and safe to the public.

For a more individual appearance a range of finial heads can be applied, which are particularly popular on residential developments. Non-standard lengths, raked, radiused, or stepped panels can be manufactured to individual requirements along with matching gates in any width, height, or design.

Product and Finish Standards

Finish is either hot dip galvanised to BS EN ISO 1461 or galvanised and polyester powder coated to BS EN 13438.

Posts and Fixings

The posts and fixings that Alexandra Security Limited offers provide a fixing system which secures the panels but allows for variations. The system is easy to install and allows the panels to be stepped, helping the fence line to follow the contours of the ground.

Options

- Other heights are available on request.
- All posts are supplied as concrete in, but all railings can be made with base plates as an option.

Height (m)	Flats (mm)	Infills (mm)	Centres (mm)	Posts (mm)	Centres (mm)
0.9	40x10	12	110	50x50	2,750
1.0	40x10	12	110	50x50	2,750
1.2	40x10	12	110	50x50	2,750
1.8	40x10	16	120	70x70	2,750

Specified at time of order.

- 1 Railing panel
