

Protek[®] 2000 Privacy

Single Wire V-Mesh Clamp Privacy Fence System

The Protek 2000 Privacy system offers the security of the standard Protek 2000 system with the additional benefit of increased privacy, thanks to the attractive timber infill panels.

There's no need to compromise on the appearance of your security fence when increased privacy is needed, thanks to the made to measure wood panel inserts. The timber is supported within the 'V' profile of the mesh and secured to the rear of the fence with a strong fixing baton. This creates a fencing surface that has no hand or foot ledges, making it even more difficult to climb over, as well as offering a privacy barrier from one side to the other.

Applications

- School Boundaries
- Public Areas
- Retail Parks
- Residential Areas

Other RAL colours available as special order

Specification

Nominal Fence Height (m)	Panel Size Height x Width (mm)	Post Centres (mm)	No. VBars per Panel	Overall Length of Post (mm)	Post Size (mm)	Number of Fixings	
						Ends/Inters (1 Clamp)	Corners (2 Clamps)
1.8	1,730 x 2,500	2,510	3	2,400	60 x 40	4	8

DATASHEET

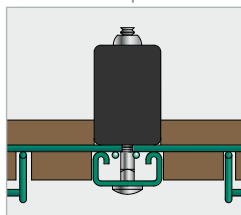

Version 1.1 | 03-23

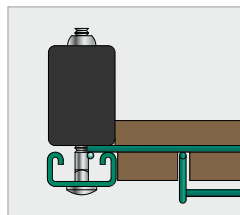

Posts, Clips and Fixings

The posts and full length clamp bars that are offered provide a fixing system which secures the panels but allows for variations. The system is easy to install and allows the panels to be stepped, helping the fence line to follow the contours of the ground. With the vandal resistant security fixings this post and clamp system provides a higher level of security than the traditional clip system.
