

Protek® Rebound Gates

Twin-Wire Sports Mesh Security Gates

Available in a standard range of heights and widths, the Protek Rebound gates are an affordable addition to your sports area.

Manufactured to your bespoke size, or for quick lead time we stock a comprehensive range of singles and doubles in various heights and widths. Hinges are inverted on all gates to prevent lift off. Double leaf gates come complete with drop-bolts and ground sockets and single leaf gates can have drop-bolts added as an extra at the manufacturing stage. All gates come with a padlockable slide-latch, padlock not provided.

Protek Rebound Gate Features

- 1 Padlockable Slidebolt
- 2 Adjustable Hinges & Gate Restrainer
- 3 Padlockable Dropbolts
- 4 Ragging plates to key into concrete
- 5 Lintel Panel

RAL colours available as special order

Protek® Rebound Gates

DATASHEET

Version 1.1 | 02-25

Slide Latch With No Protruding Handle

Our slide latches are padlockable and are designed and manufactured not to have any edges that protrude outside of the gate face. This is especially important when gates are used in the education sector.

Gate Restrainers Fitted As Standard

All Protek gates also come with gate restrainers, a simple but essential safety device to prevent the gate failing should the top or bottom hinge fail. These very strong restrainers are capable of holding gate leaves on all sizes in the Protek range.

In-Board Dropbolts With No Protruding Edges

Both our single and double-leaf gates feature in-board dropbolts that can be padlocked. The in-board design keeps the bolt flush against the gate face when in the open or locked position.

Options

- Various lock options available including, Key Lock, Digital Lock, Maglock and Panic Latch
- Self-Close Hinges
- Locking Dropbolts
- Lintel Panel

Applications

- Schools
- Sports Facilities
- MUGAS
- Playgrounds
